

VERTICAL COMBINATOR

MORE THAN LEARNING.

An environment to learn real skills, build real things, and develop your own career or something of your own.

LEARN

BUILD

GROW

A place to do the work.

Less sitting and listening. More trying, making, getting feedback, and learning how to figure things out.

IN-PERSON WORKSPACE

Work from a dedicated physical environment for focus, collaboration and hands-on sessions. Ask questions, work alongside other builders and make steady progress.

BUILD REAL WORK

Turn learning into actual work: AI applications, products, experiments and other meaningful builds. The goal is to make something functional, not simply finish a tutorial.

MENTOR GUIDANCE

Get feedback while you build. Discuss your approach, identify what can improve, and iterate through mentor feedback and peer critique.

BUILD YOUR PORTFOLIO

Turn the work you build into visible proof of capability — projects and outcomes that show what you can actually do.

WHAT LEAVES WITH YOU

Work • Judgment • Momentum • People

CHOOSE YOUR DIRECTION

THREE PATHS.

Come with a goal, or come to discover one. Start with the path that fits where you are.

01

AI BUILDER

Build practical AI products and systems.

- Level 1: AI literacy, programming basics and first useful builds.
- Level 2: LLMs, RAG, agents, product engineering and deployment.
- Level 3: Architecture, evaluation, reliability and scaling.

02

STARTUP BUILDER

Turn a problem into a validated venture.

- Discover and validate a real problem.
- Build an MVP, talk to users and iterate.
- Move toward retention, revenue and growth.

03

CAREER BUILDER

Build proof, positioning and career direction.

- Choose a target role and map its skill requirements.
- Build meaningful projects and portfolio evidence.
- Prepare for applications and interviews.

BUILT AROUND WHERE YOU ARE

REAL BENEFITS.

The experience changes with your stage — while the builder mindset stays the same.

EARLY ADVANTAGE

SCHOOL STUDENTS

Build an early foundation in AI, programming logic and practical tools. Explore technology through hands-on work and start creating proof before college.

PRODUCTION PROOF

COLLEGE STUDENTS

Move beyond tutorials into practical AI applications and development workflows. Build meaningful technical work and improve it through feedback.

PRODUCT LAUNCHPAD

ASPIRING FOUNDERS

Identify and validate a real problem, plan and build an MVP, talk to users, learn from feedback and iterate toward a real venture.

CAREER PROOF

GRADUATES & JOB SEEKERS

Choose a target role, map the skills it requires, build meaningful project evidence and prepare your resume, applications and interviews.

YOUR WORK BECOMES YOUR PROOF

WORK • JUDGMENT • MOMENTUM • PEOPLE

Projects, better decisions, a practical next step, and a community of builders.

FOUNDING MEMBER PRICING

DURATION & FEES.

Choose the starting point that matches your current level and goal.

AI BUILDER

Level 1 — AI Foundation & Builder Beginner level	1 MONTH	₹3,000
Level 2 — AI Application Builder Intermediate level	1 MONTH	₹6,000
Level 3 — Production AI Engineer Advanced level	1 MONTH	₹10,000

OTHER PATHS

STARTUP BUILDER

Problem → MVP → users → growth

₹20,000

6 MONTHS

OTHER PATHS

CAREER BUILDER

Direction → skills → proof → work

₹15,000

3 MONTHS

READY TO FIND YOUR PATH?

Take the assessment and start with the path or level that fits your current stage.
